3.2. Desirable Criteria

As per the objectives of the City's Contracting Authority and Purchasing policy, the City encourages, as a preference, contracting agreements and purchasing criteria that promote reduction of greenhouse gases (GHG) and considers the life cycle costs of an acquisition rather than just the initial purchase price. The City shall give preference to contracts, equipment, machinery, vehicles and supplies that incorporate green or sustainable business practices or technology, or that have a history of excellent service and support capabilities and offerings.

3.3. Contract

This RFP is not an agreement to purchase goods or services. Notice in writing to a Proponent that it has been identified as a successful Proponent will not constitute a Contract. Any resultant award will be made by means of a Purchase Order. The RFP will be incorporated by reference in the Purchase Order which will, together with the Terms and Conditions of Purchase, form the contract between the City and the successful Bidder.

The successful Bidder will be required to deliver all supplemental data information, parts manual, instruction booklets, warranty certificates and all other applicable information pertaining to the Unit upon delivery of the Unit to the Site. Failure to deliver all of the required information may result in a 5% holdback being applied to the purchase price until delivery of materials/information is complete.

The City is not under any obligation to award a “contract” and may elect to terminate this RFP at anytime.

4. Specifications

4.1. General

Wherever the Specifications state a brand name, make, name of manufacturer, trade name, or Supplier catalogue number, it is for the purpose of establishing a grade or standard. It is not intended to rule out competition from equal brands or makes. If a product other than that specified is offered, it is the Bidder’s responsibility to provide information in its Quotation that enables the City to confirm equivalency and acceptance.

Except where stated otherwise, the Specifications describe what is considered necessary to meet the performance requirements of the City and Proponents should consider this in their proposal or, if the Proponent cannot meet Specifications, the Proponent may identify and offer an alternative which it believes to be an equal or better alternative. Proponents shall clearly indicate any variances from the City’s Specifications or conditions and attach descriptive literature/specifications.

4.2. Alternative Proposal
