MEDIA RELEASE: FOR IMMEDIATE RELEASE

Rotary Free Wi-Fi Zone

The City of Grand Forks, Grand Forks Credit Union, Community Futures Boundary and Grand Forks Rotary jointly purchased and created a free downtown wireless hot spot. There are currently 6 access points installed that connect through the Grand Forks Fiber Optic Network to the internet. The Rotary Free WIFI zone covers the campground and city park area, as well as a good section of the downtown core area.

The system uses outdoor Meraki (a division of Cisco) access points to provide these Gateways and Mesh connections.

The 6 access points were connected during the week of August 5th and during the first week a total of 16GB of traffic and over 400 different devices have connected to the wireless network.
